Education

Shenzhen University

2017.09-2021.06

Core Curriculum

Industrial Design Bachelor of Engineering (First Class Honours)

Ranking: 1 / 40 GPA: 3.95/4.5 (88%)

/ New product development and design (A)
/ Foundations of Design Engineering (A+)
/ Man-machine Engineering (A) / Engineering Graphics (A)
/ Materials and Techniques (A+) / 3D Construction (A+)

Working Experience

Product Manager

2021.12-2022.10
(10 months)

Shenzhen Breo Technology Co., Ltd.

Breo is a listed company focusing on healthcare intelligent hardware. During my time at Breo, I was primarily responsible for new product development, iteration and category management for head massagers.

1.New product development:

Daily monitored the industry of massagers, eg: studied competitive products by experiencing and disassembling, conducted technical research by attending exhibitions and meeting techno suppliers.

2.Product category management:

Daily monitored category sales data, monthly output reports with concrete solutions, as well as reporting to my superiors. A framework that I designed for monthly data analysis is currently applied to the daily analytics of the entire department.

3.Iteration for existing products:

Based on market sales data and user feedback, optimization of existing products was launched, adapting to company's new business strategy.

Projects at work

Multi-channel versions of Neck C2

Product owner
Project manager
2022.2-2022.10

Based on the market characteristics of 4 sales channels (Tiktok store, cross-border e-commerce, gift industry, ODM), I planned 4 versions of the product and involved in the whole process till mass production launch. Including:

Early stage: 1. Research competitive products on the market and communicate with channel sales to capture business needs; 2. Draft PRD.

Duration: 1. Coordinating with internal R&D team and external manufacturers, participate in the review of industrial design and technical solutions, supervised the product performance, prototype UX, and product cost. 2. Acted as project manager, I was responsible for project scheduling, reliability testing and product's certification.

Latter stage: 1. Planning product marketing materials for promotional campaigns, such as product introduction webpage scripts and video shooting scripts; 2. Working with sales departments to conduct sales training and participated in the creation for sales strategies and tactics.

Scholarships and Awards

2021

- University Awards for **Outstanding Graduate**
- First Class Honours** Bachelor's Degree

2020

- Bronze Award: Singapore Art Design Contest
- The 3rd Prize Award: Innovative Future Design Competition
- Merit Award: International Council of Art and Design Award

2019

- Collection Certificate** for Excellent Students' Works (Product Sketching)

2018

- Top Level Scholarship:** Star of SZU
- (1/2 among the entire grade)
- The 1st Prize Scholarship:** Star of Learning
- The 3rd Prize Scholarship: Star of Public Welfare
- The 1st Prize Award: "FLTRP Cup" English Reading Contest

Language

Cantonese (native)
Mandarin (native)
English (fluent, IELTS 6.5)

Knowledge and Skills

/ Industry studies / Market data analysis
/ Competitor research
/ Customer needs assessment
/ Products definition

New Product Planning

/ IPD Model for Product Development
/ Project management / 3D Modeling
/ Prototyping / Materials and Manufacturing
/ User Experience Design
/ Service-System Design
/ Exterior Design / UI Design / Branding

Product Development

/ Questionnaires / A/B Testing
/ 1-to-1 interviews / Focus Group

Research Skills

/ AutoCAD / Rhino / Keyshot
/ Figma / Axure / HTML+CSS
/ Photoshop / Final Cut

Software

Optimal for Dream 6 head massager

2022.8-2022.10

Product owner
User researcher

1. Designed a whole research package, such as user interviews, product A/B testing, store visits, etc., and independently accomplished the research.
2. Locate defects of the product, e.g. people with wide head size cannot fit in, surface of the product would be worn out after repeated folding, etc.
3. Initiated the iteration project as the lead, compiled other co-workers for concrete efforts, and managed to bring measures like structure optimization, packaging upgrade, and sales tactics iteration to the ground.

Projects at school

Smart Hardware

2020.05-2020.07

Team Leader

Concept: Mini AI interview recorder

1. Overview research of AI technology
2. Sorted the overall product design process to locate design opportunities
3. Conducted qualitative research and uncovered user needs during interviews
4. Completed the industrial design and interaction design of the concept collaboratively with teammates.

Research on AI

HCI for Smart Products

Mobile Apps

2020.05-2020.06

Solo Projects

Product Document for Healthcare App

1. Conducted market research, competitive product analysis and technical research around health management
2. Carry out user research and requirement analysis
3. Undertake product architecture and output docs (BRD, MRD, PRD)

App Design

Health Management

Home Appliances

2019.09-2019.10

Solo Projects

Foam dispenser for exquisite ladies

1. Competitive product analysis, involving 30 products
2. Conducted market research to uncover a new product positioning for exquisite ladies
3. Implementing product innovation through structural optimization, industrial design and GTM strategies.

Positioning Innovation

Structure Exploration

Solid model

2019.05-2019.06

Solo Projects

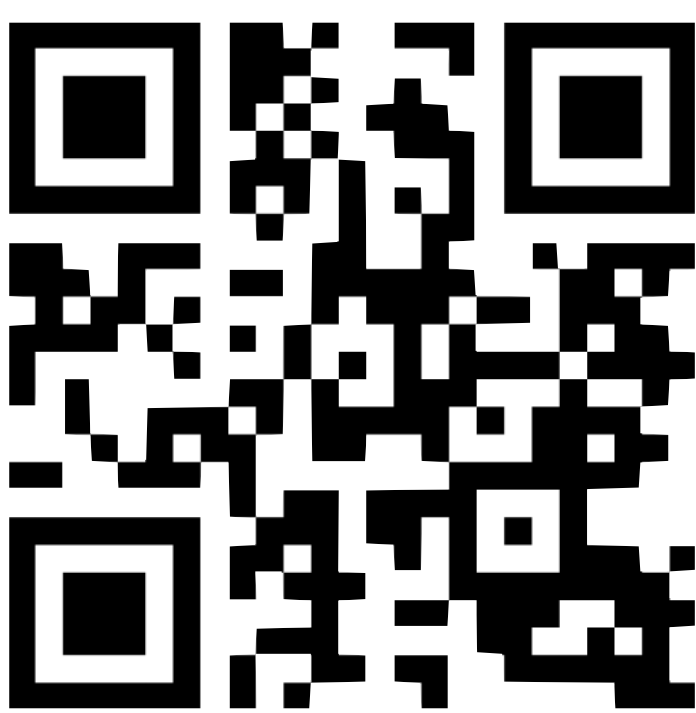

Prototyping - Kirov Airship

1. Integrated consideration of finishing method and material
2. Finish the making process through AutoCAD drafting, laser cutting, machine grinding, spraying and coating, etc.

Prototyping

Materials and Finishing

智能硬件·迷你AI访谈录影机

智能硬件概念，探讨产品设计过程中，该如何应用AI技术以提高工作效率

产品文档·健康管理 App

产品策划练习项目，包含产品三大文档（BRD、MRD、PRD）

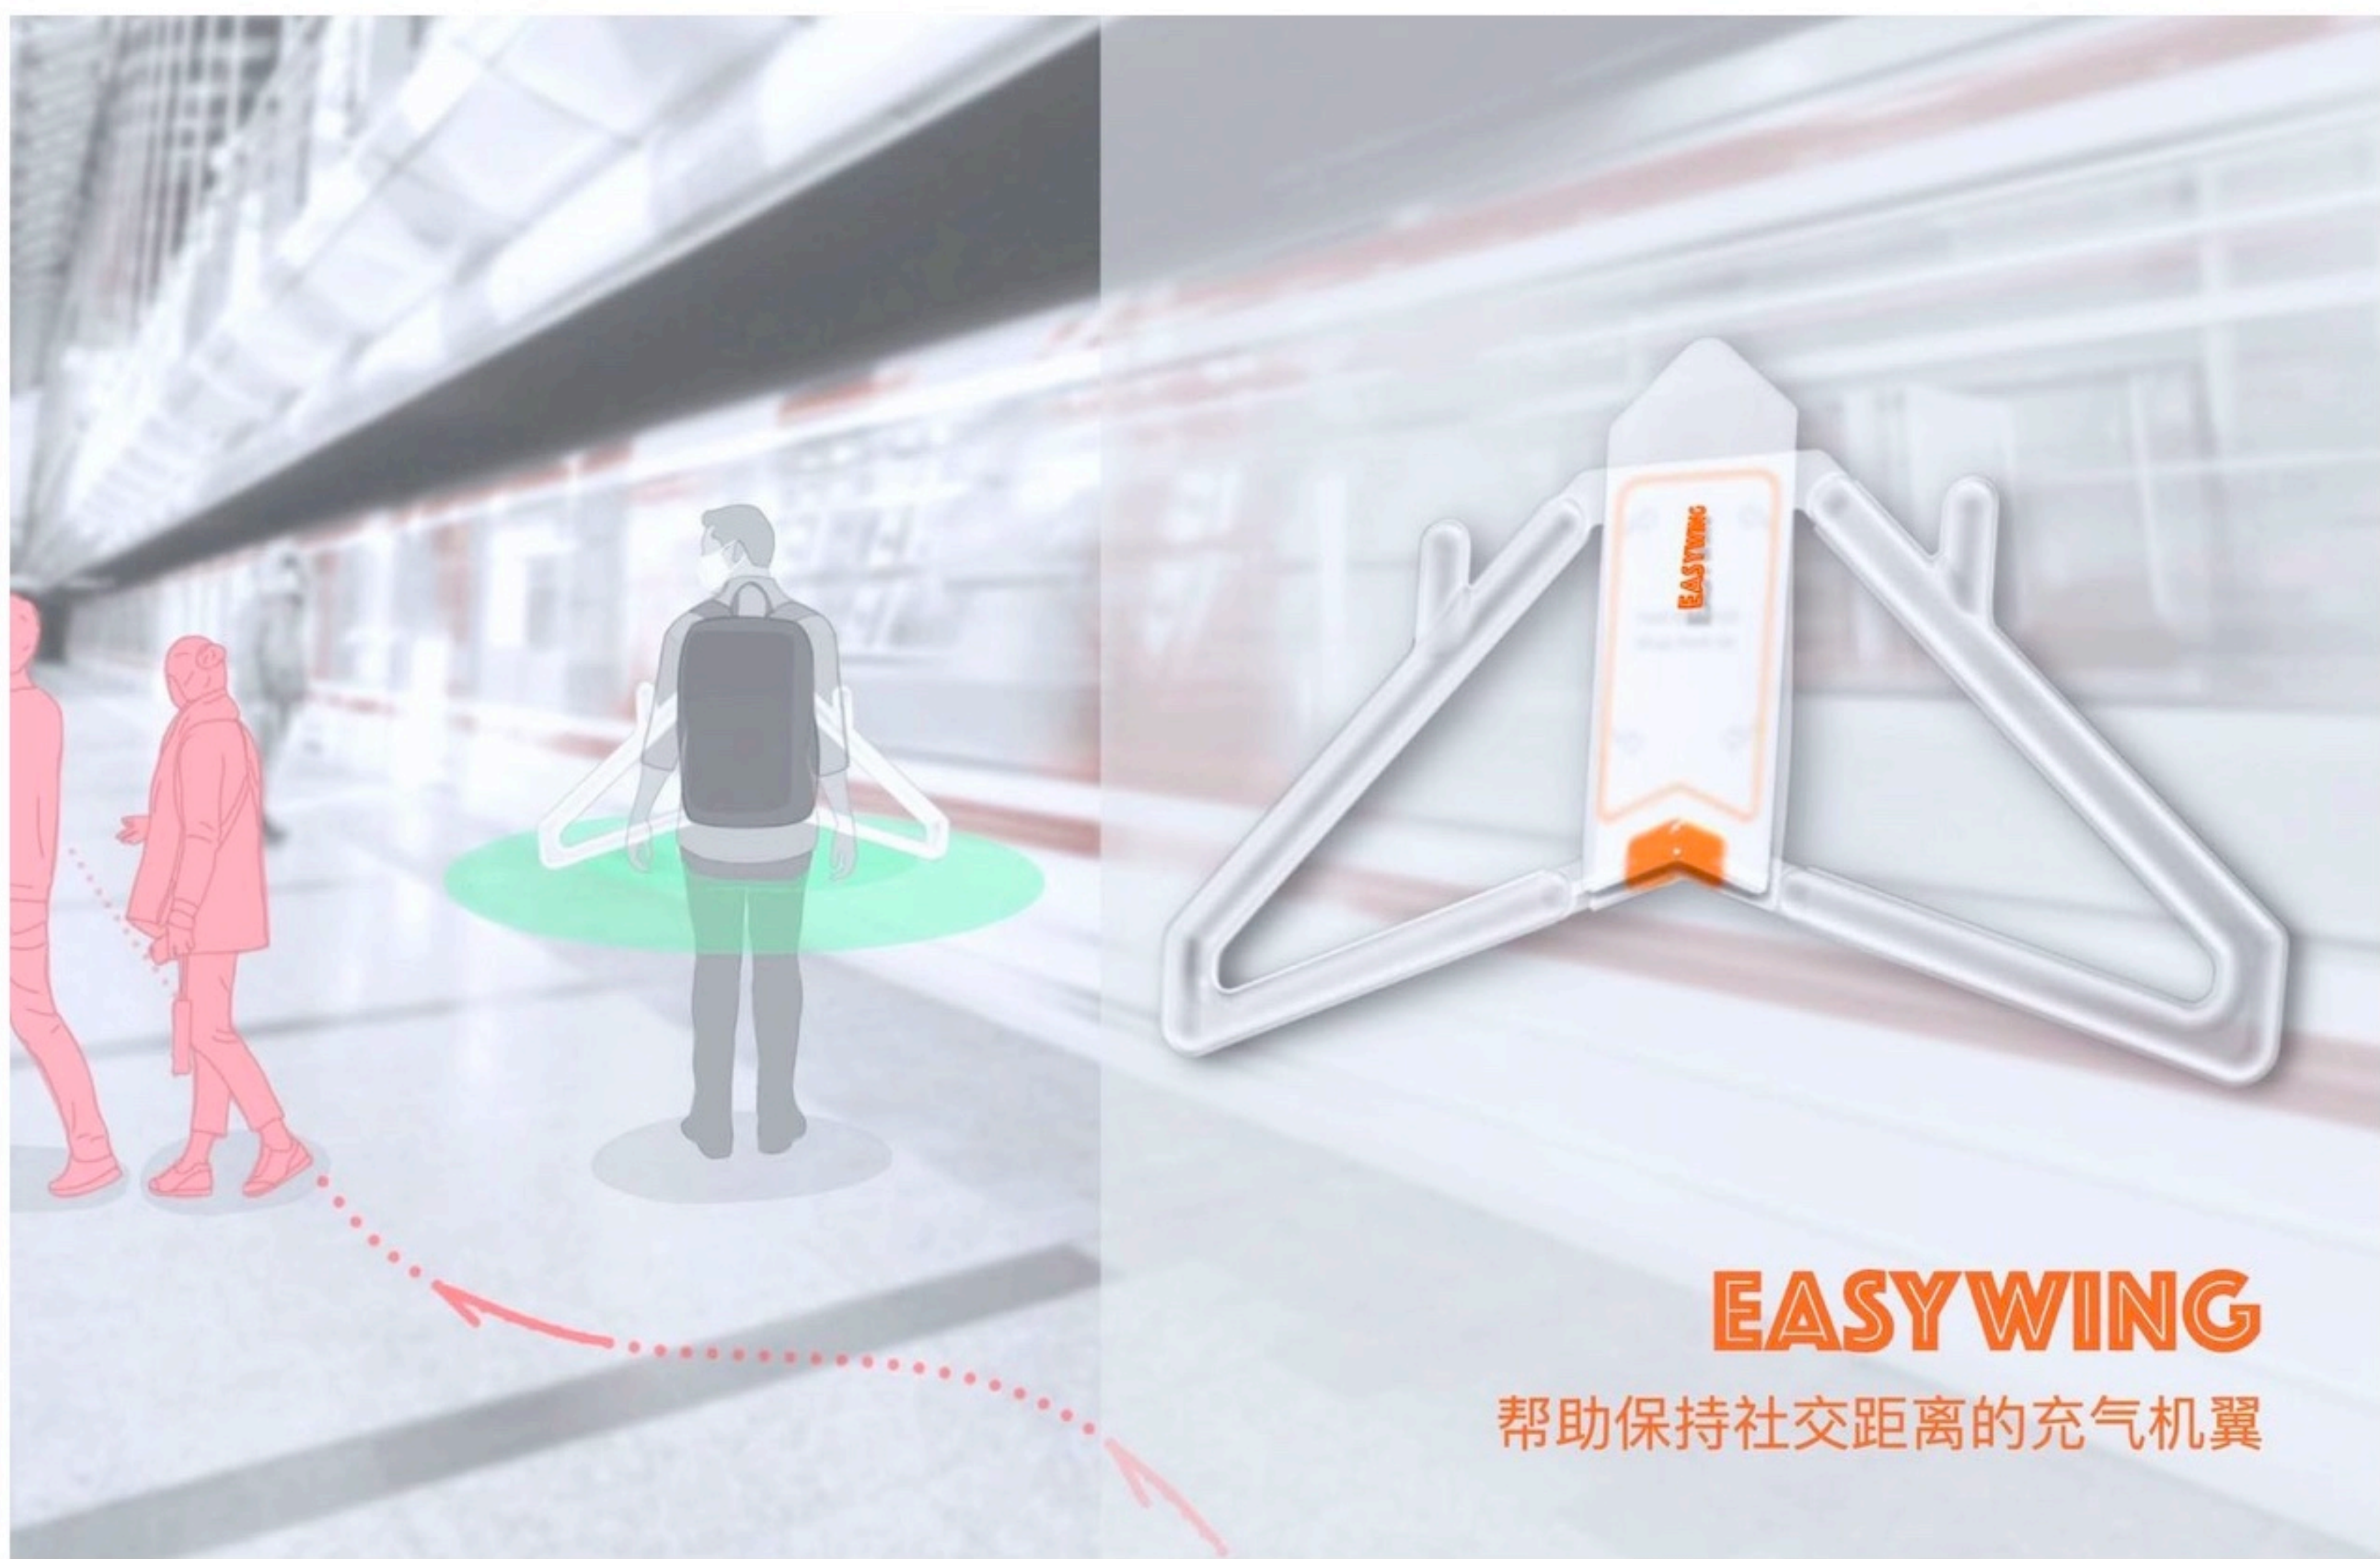

智能小家电·自动泡沫洗手机

在研究竞品、挖掘用户需求基础上，对自动洗手机产品品类进行创新定位，并提出相关营销策略

实物模型·基洛夫飞艇

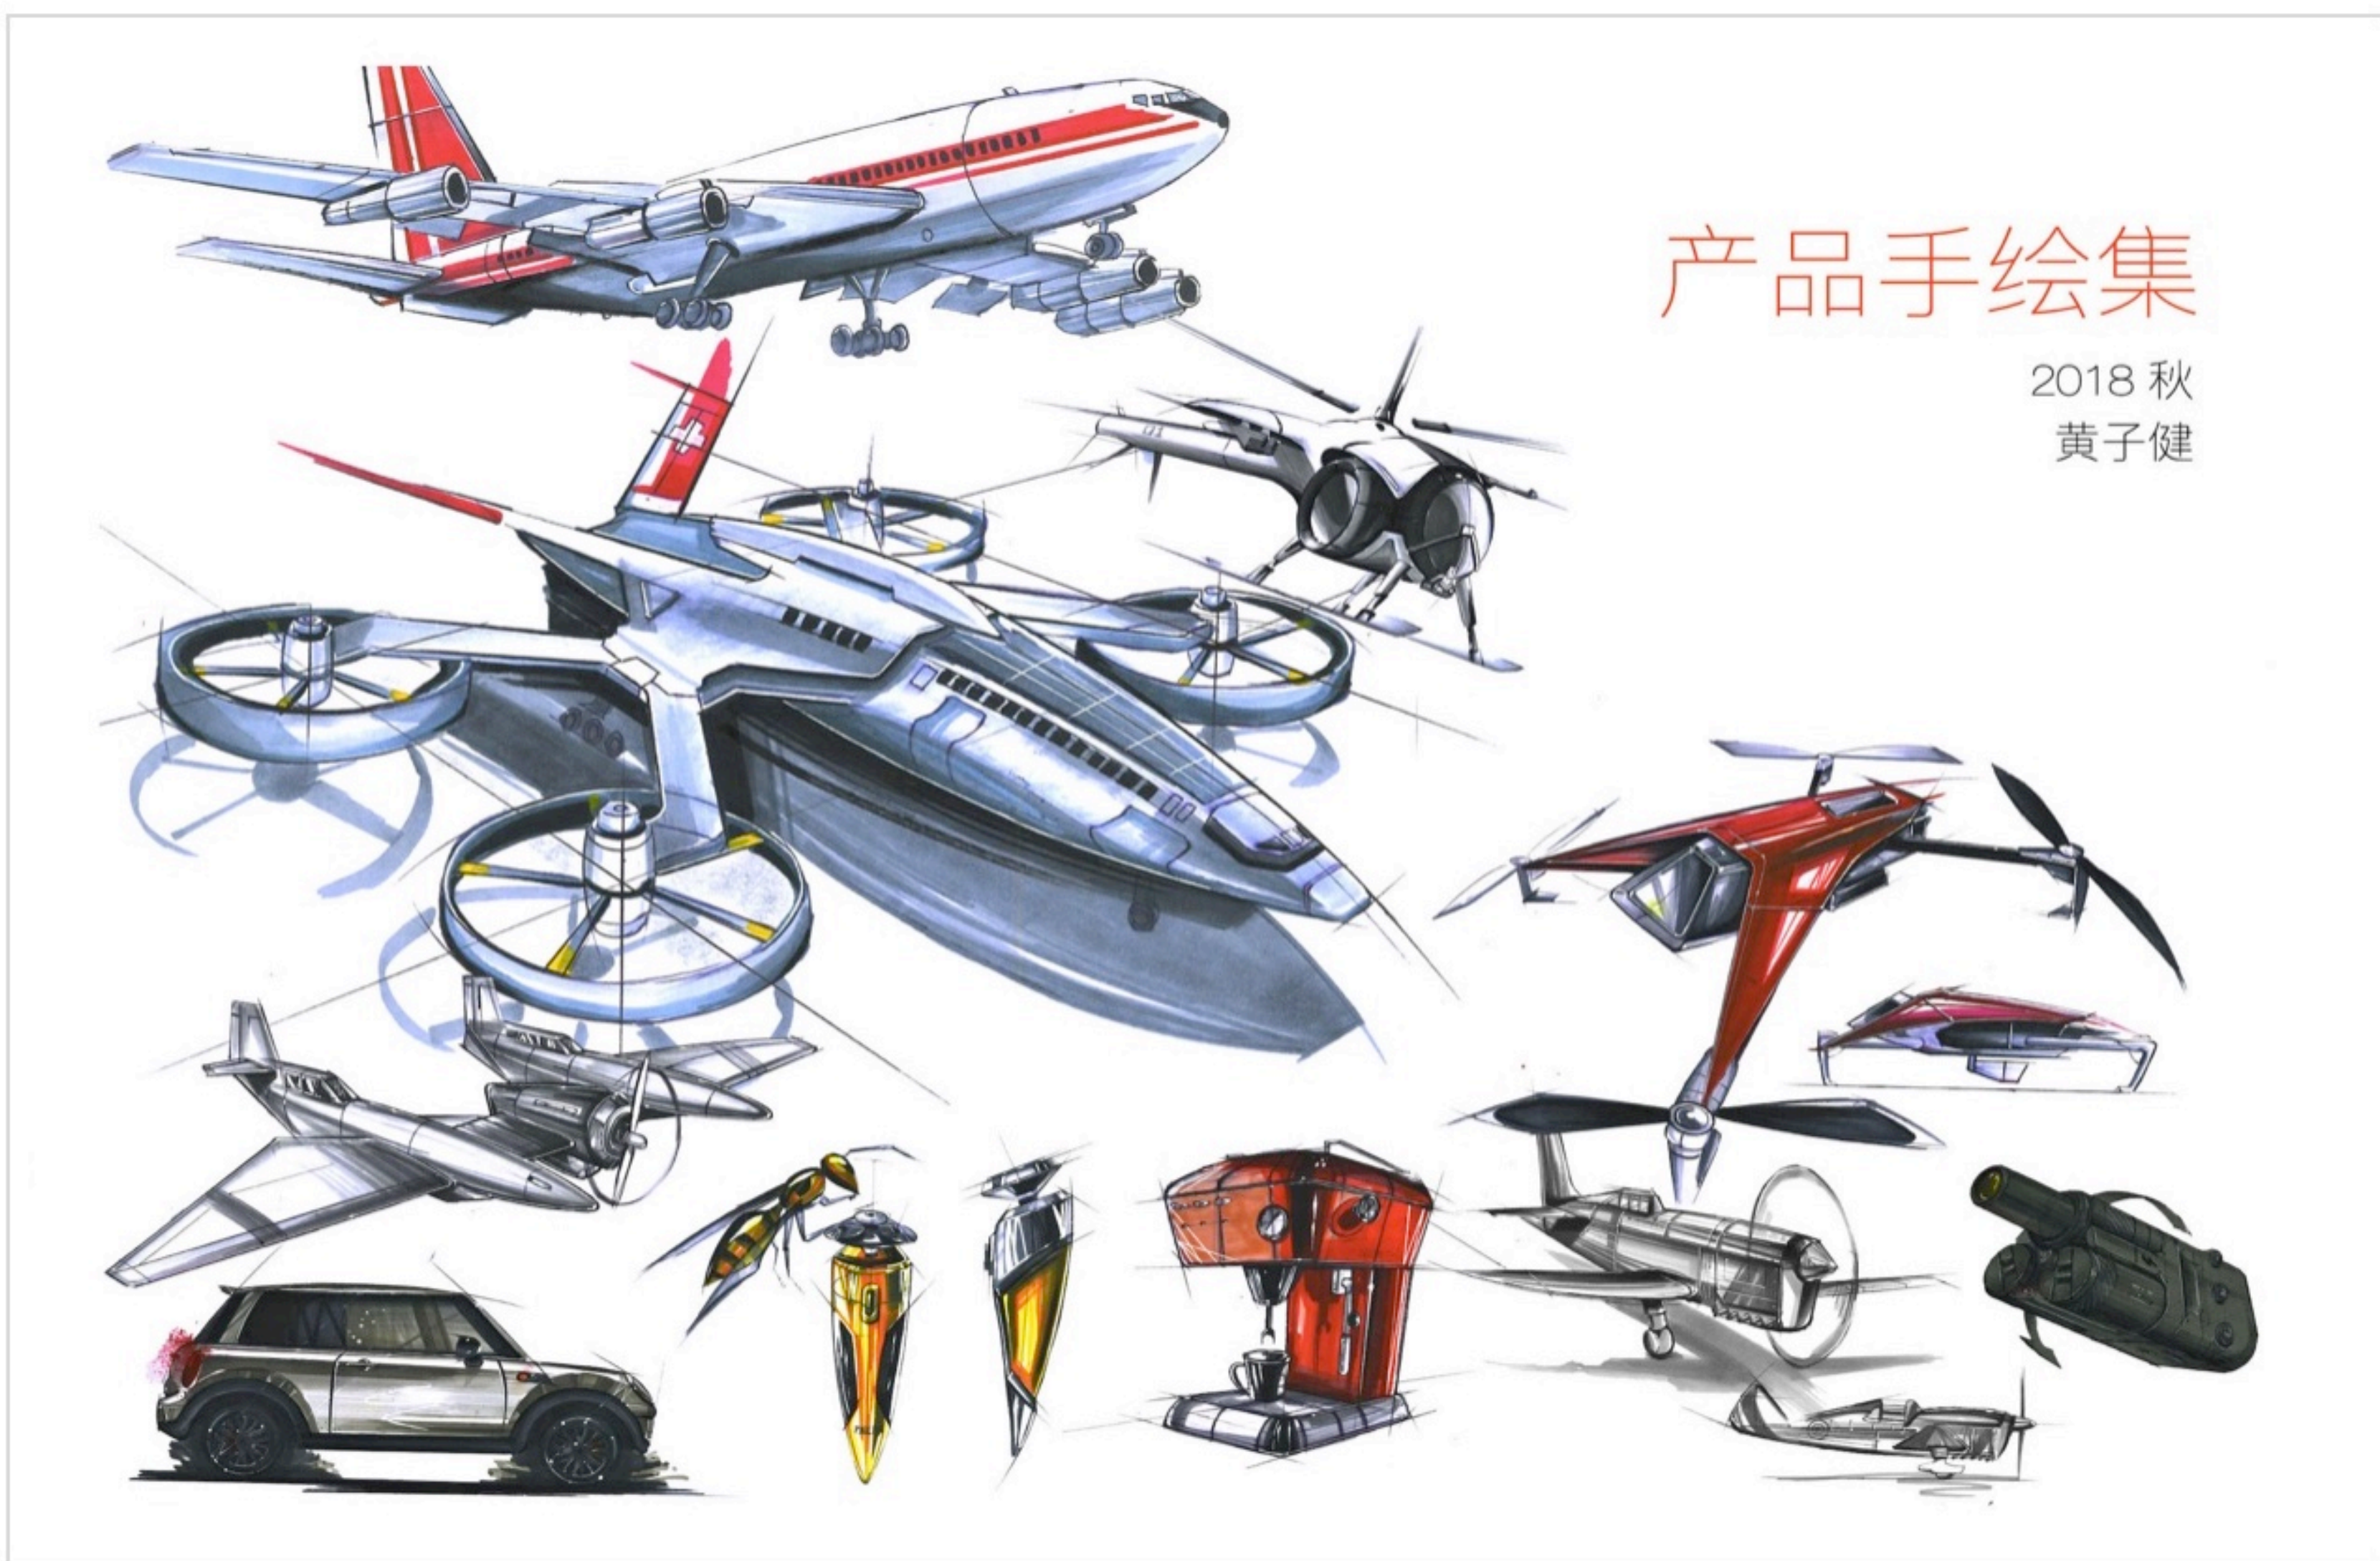

独立完成的实体模型项目，包含 CAD 制图、选材、工序规划、器械操作等流程

抗疫创意产品·“易翼”充气挂件

创意产品概念，包含用户调研、市场调研、生产工艺及材料分析、产品方案
