Scholarships and Awards

2021
• University Awards for **Outstanding Graduate**

2020
• Bronze Award: Singapore Art Design Contest
• The 3rd Prize Award: Innovative Future Design Competition
• Merit Award: International Council of Art and Design Award

2019
• **Collection Certificate** for Excellent Students' Works (Product Sketching)

2018
• **Top Level Scholarship:** Star of Shenzhen University (1/2 among the entire grade)
• **The 1st Prize Scholarship:** Star of Learning
• The 3rd Prize Scholarship: Star of Public Welfare
• The 1st Prize Award: "FLTRP Cup" English Reading Contest

Language

Cantonese (native)
Mandarin (native)
English (fluent, IELTS 6.5)

Education

Shenzhen University

2017.09-2021.06

Core Curriculum

Working Experience

Product Manager

2021.12-2022.9
(10 months)

Industrial Design Bachelor of Engineering (First Class Honours)

Ranking: 1 / 40 GPA: 3.95/4.5 (88%)

/ New product development and design (A)
/ Foundations of Design Engineering (A+)
/ Man-machine Engineering (A) / Engineering Graphics (A)
/ Materials and Techniques (A+) / 3D Construction (A+)

Shenzhen Breo Technology Co., Ltd.

Breo is a listed company focusing on healthcare intelligent hardware. During my time at Breo, I was primarily responsible for product development, iteration and category management.

1.New product development:

Via OBM or OEM, in line with IPD model, projects mainly included processes like: pre-planning, market&technical reviews, prototyping, pilot and mass production. Planning work was based on daily studies of the industry, like competitive products studying, exhibitions attending and meeting techno suppliers.

2.Iteration for existing products:

Evaluated consumers' and retailers' feedback, market sales data. Conducted user research, product testing. Planed improvement strategies, worked with R&D to evaluate and enforce implementation. Continuous tracking of market performance after the improvement.

3.Product management (Head Massager)

Managed the listing and off market of products, pricing, channel distribution. Monthly analyzed sales data for head massager category.

(Product department distributed work according to massaging areas. I was responsible for the massager for head.)

Projects at work

Based on the market characteristics of 4 sales channels (Tiktok store, cross-border e-commerce, gift industry, ODM), I planned 4 versions of the product and involved in the whole process till mass production launched. Including:

Early stage: 1. Conducted research on competitive products and communicated with channel sales to capture business needs; 2. Drafted Product Requirement Document.

Duration: 1. Coordinated with internal R&D team and external manufacturers, participated in the review of industrial design and technical solutions, supervised the product performance, prototype UX, and product cost. 2. Acted as project manager, I was responsible for project scheduling, reliability testing and product's certification.

Latter stage: 1. Planned product marketing materials for promotional campaigns, such as scripts for introduction webpage, video shooting scripts; 2. Worked with sales departments to conduct sales training and participated in the creation for sales strategies and tactics.

Multi-channel versions of Neck C2

Product owner
Project manager
2022.2-2022.10

Knowledge and Skills

/ Industry Studies / Market Data Analysis
/ Competitor Research
/ Customer Needs Assessment
/ Products Definition

New Product Planning

/ IPD Model for Product Development
/ Project Management / 3D Modeling
/ Prototyping / Materials and Manufacturing
/ User Experience Design
/ Service-System Design
/ Exterior Design / UI Design / Branding

Product Development

/ Questionnaires / A/B Testing
/ 1-to-1 Interviews / Focus Group

Research Skills

/ AutoCAD / Rhino / Keyshot
/ Figma / Axure / HTML+CSS
/ Photoshop / Final Cut

Software

Optimal for Dream 6 head massager

2022.8-2022.10

Product owner
User researcher

1. Designed a whole research package, such as user interviews, product A/B testing, store visits, etc., and independently accomplished the research.
2. Located defects of the product, e.g. people with wide head size cannot fit in, surface of the product would be worn out after repeated folding, etc.
3. Initiated the iteration project as the lead, compiled other co-workers for concrete efforts, and managed to bring measures like structure optimization, packaging upgrade, and sales tactics iteration to the ground.

Projects at school

Smart Hardware

2020.05-2020.07

Team Leader

Concept: Mini AI Interview Recorder

1. Overview research of AI technology.
2. Sorted the overall user journey to locate design opportunities.
3. Conducted qualitative research and uncovered user needs during interviews.
4. Completed the industrial design and interaction design of the concept collaboratively with teammates.

General study on AI

HCI for Smart Products

Mobile Apps

2020.05-2020.06

Solo Projects

Product Document for Healthcare App

1. Conducted market research, competitive product analysis and technical research around health management.
2. Carried out user research and user needs analysis
3. Undertook product architecture and outputted standard documents (BRD, MRD, PRD).

App Design

Health Management

Home Appliances

2019.09-2019.10

Solo Projects

Foam Dispenser for Exquisite Ladies

1. Competitive product analysis, involving 30 products.
2. Conducted market research to uncover a new product positioning for exquisite ladies.
3. Implemented product innovation through structural optimization, industrial design and GTM strategies.

Positioning Innovation

Structure Exploration

Solid model

2019.05-2019.06

Solo Projects

Prototyping - Kirov Airship

1. Integrating consideration of finishing method and material, I conducted general planning for the crafting process.
2. Finished the making process through AutoCAD drafting, laser cutting, machine grinding, spraying and coating, etc.

Prototyping

Materials and Finishing

智能硬件·迷你AI访谈录影机

智能硬件概念，探讨产品设计过程中，该如何应用AI技术以提高工作效率

产品文档·健康管理 App

产品策划练习项目，包含产品三大文档（BRD、MRD、PRD）

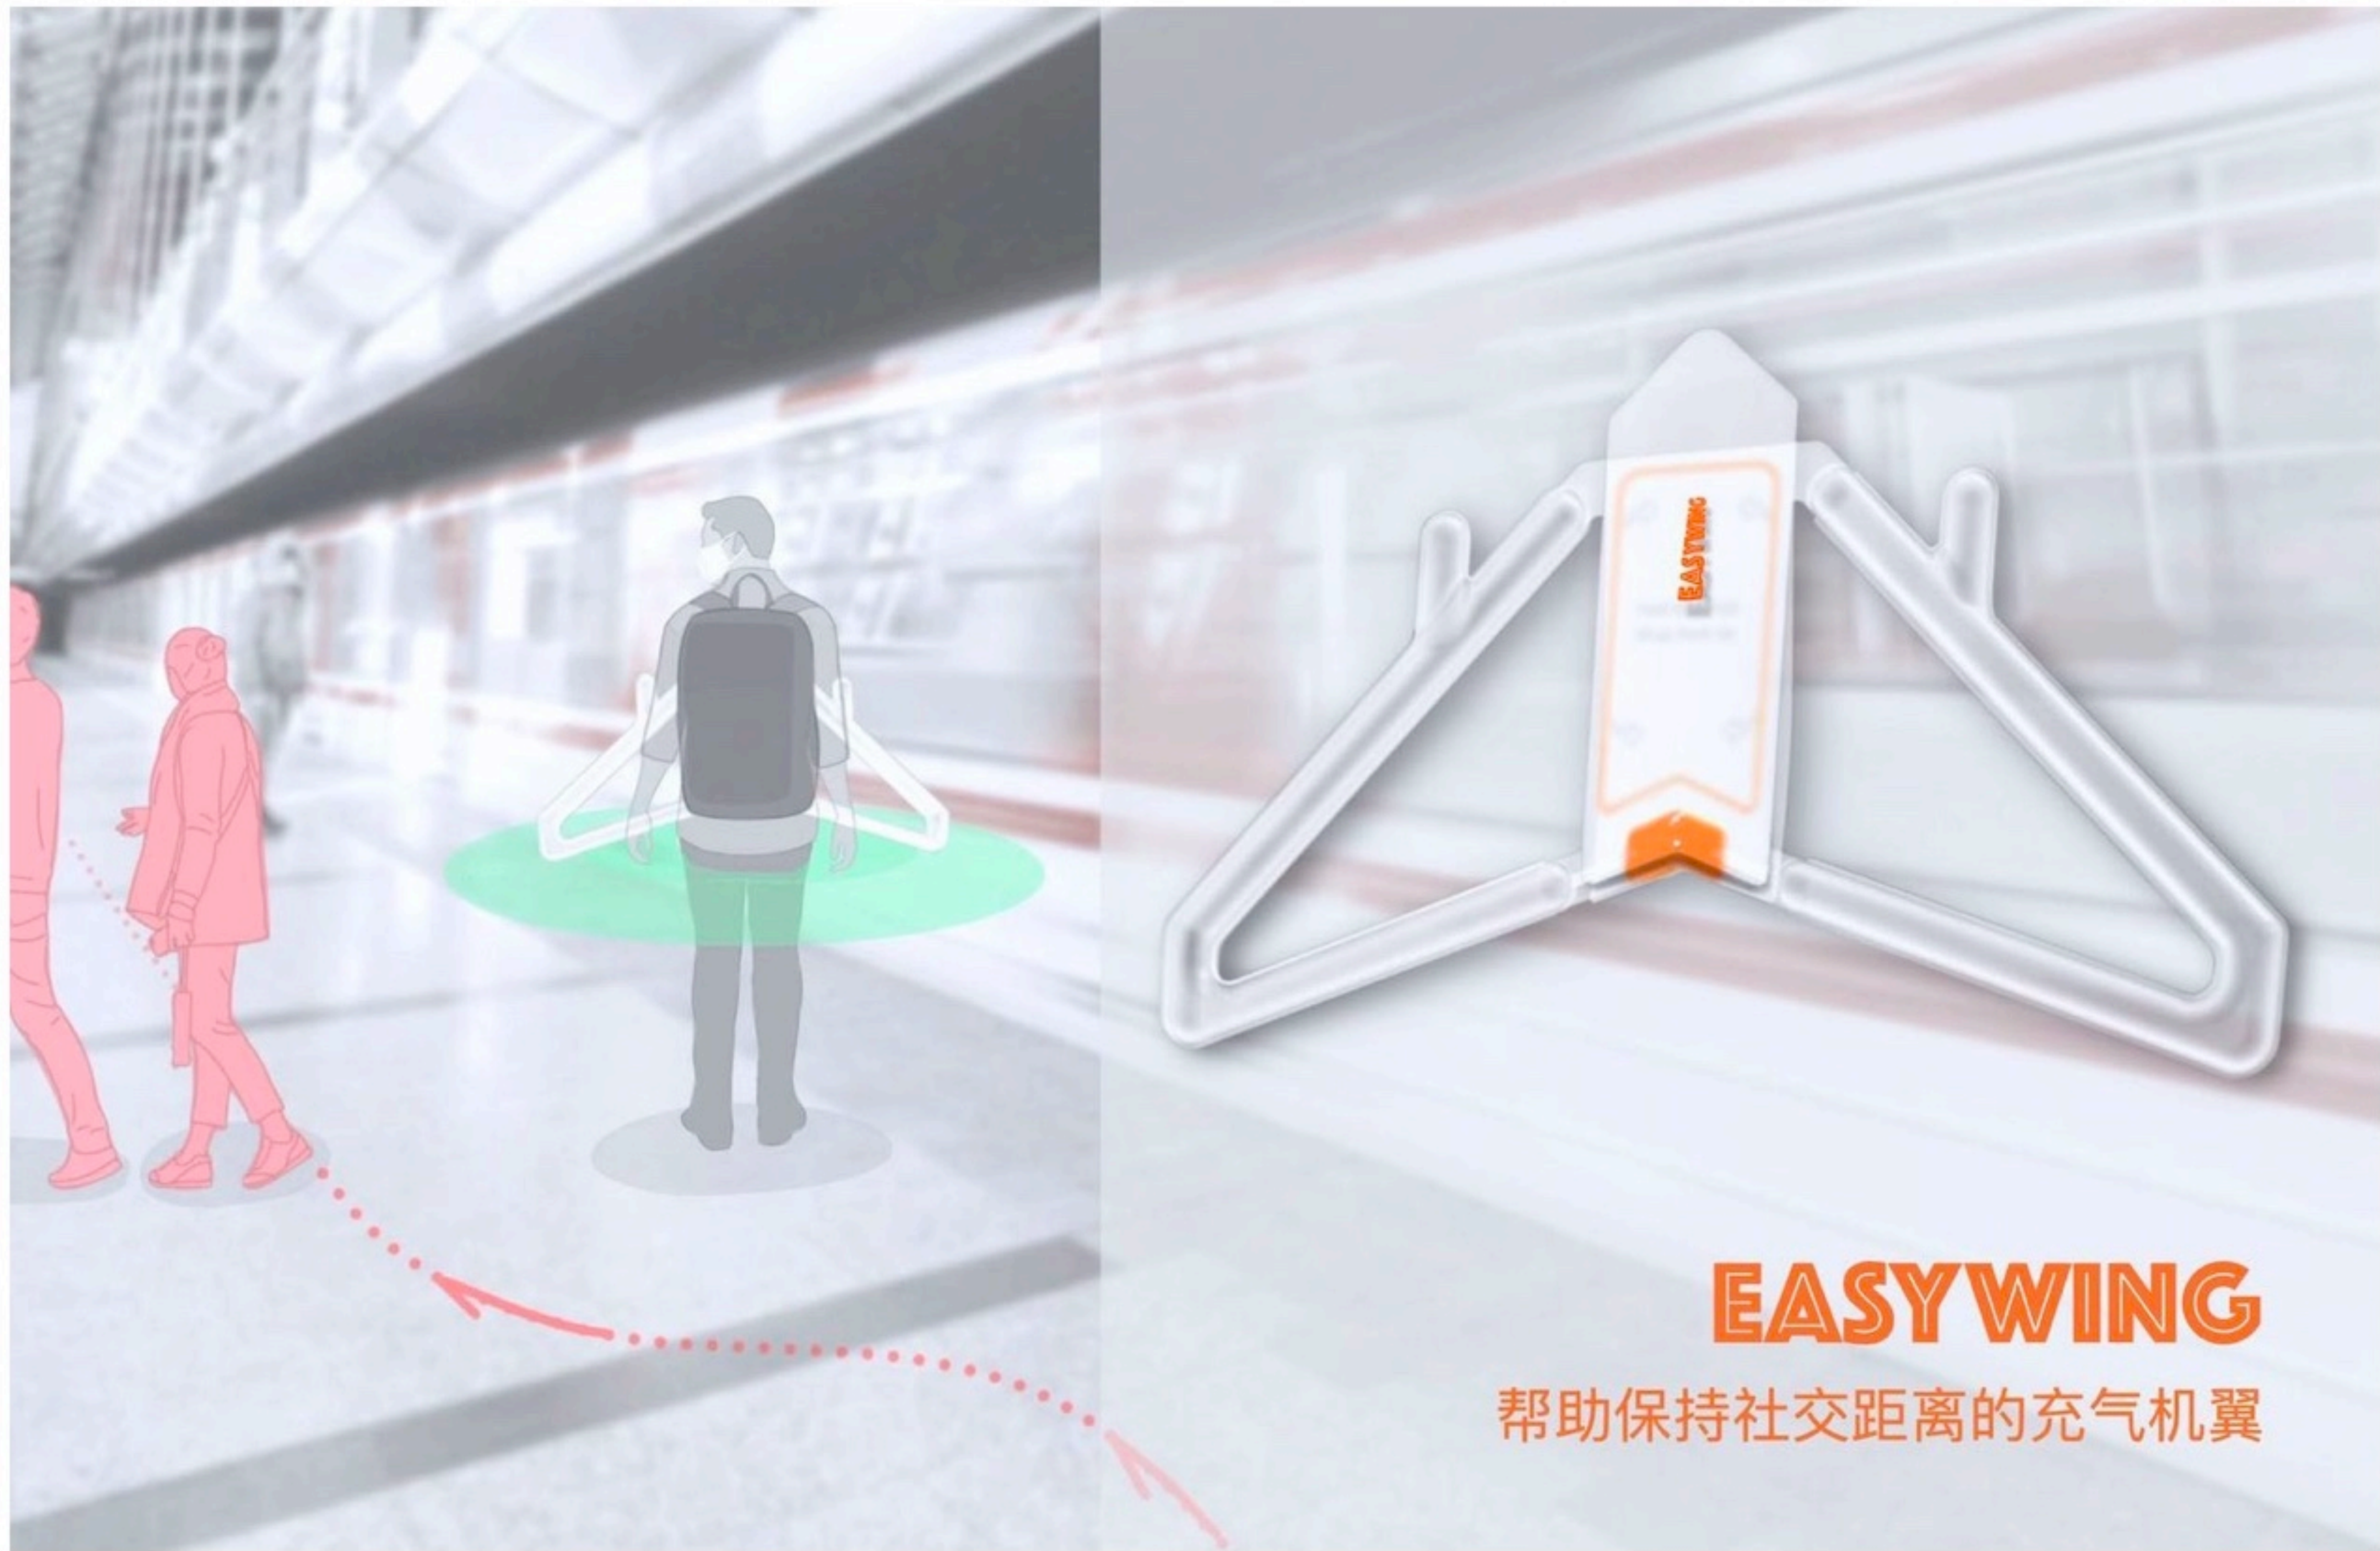

智能小家电·自动泡沫洗手机

在研究竞品、挖掘用户需求基础上，对自动洗手机产品品类进行创新定位，并提出相关营销策略

实物模型·基洛夫飞艇

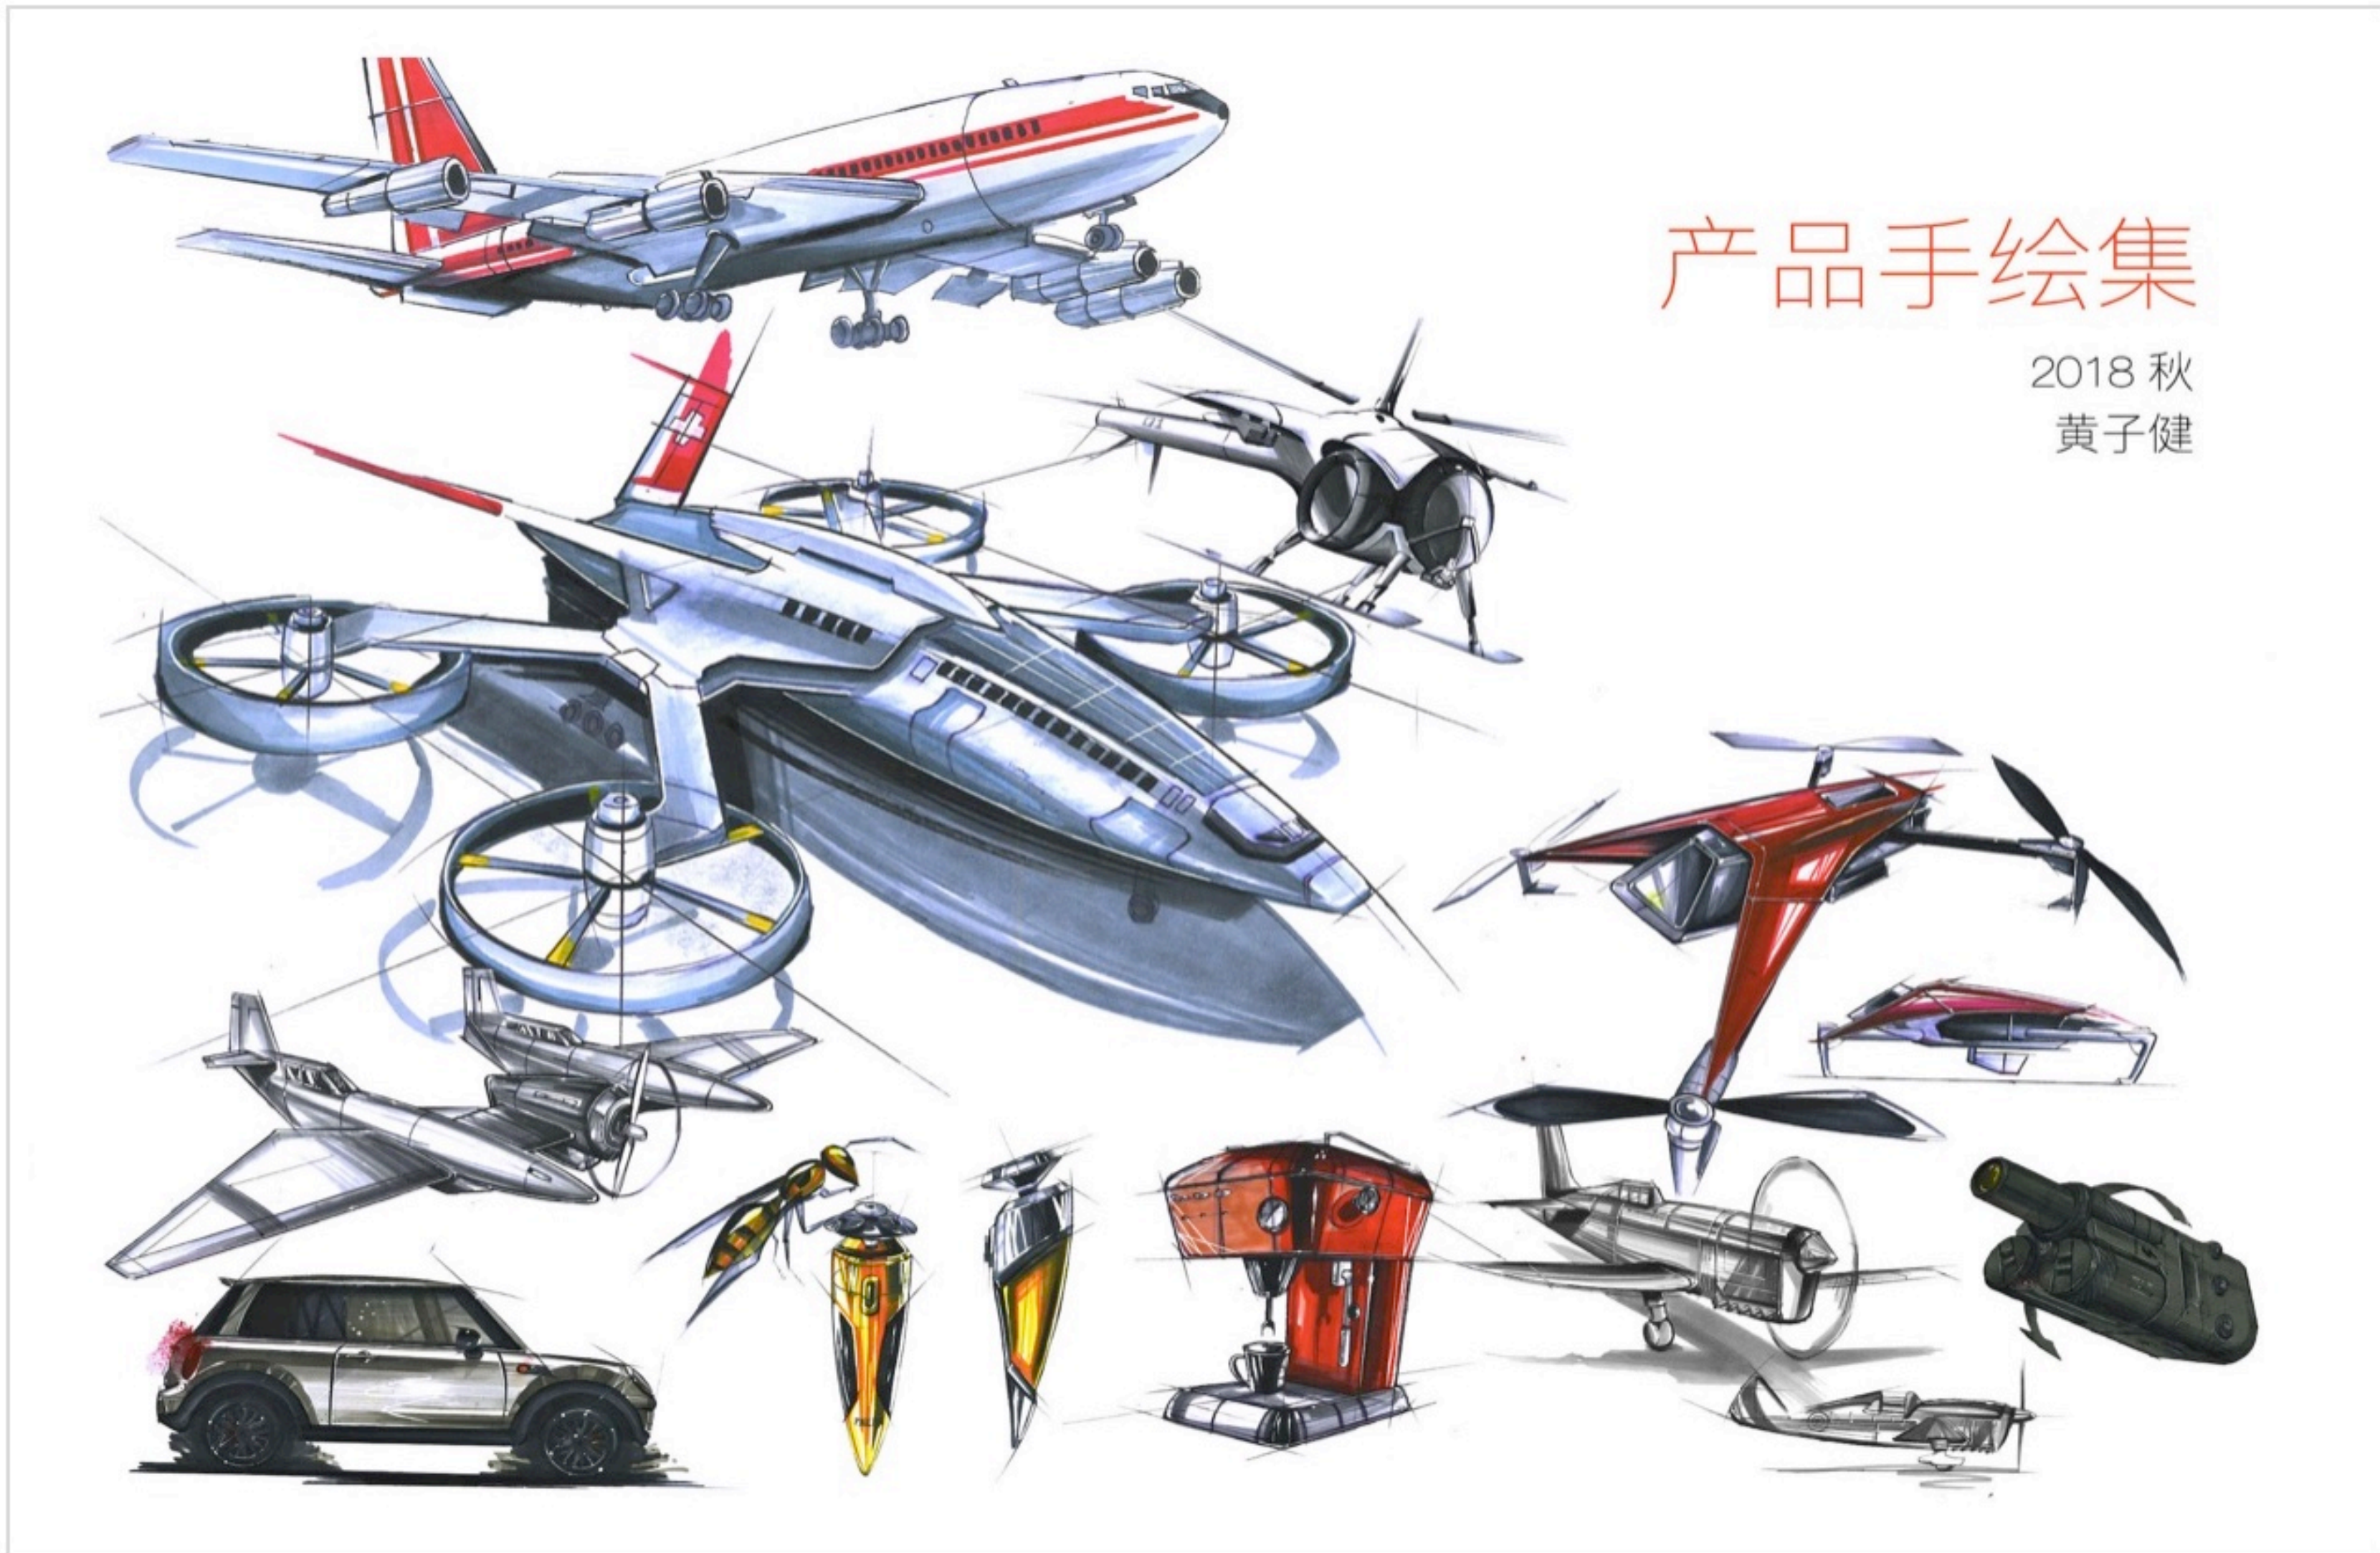

独立完成的实体模型项目，包含 CAD 制图、选材、工序规划、器械操作等流程

抗疫创意产品·“易翼”充气挂件

创意产品概念，包含用户调研、市场调研、生产工艺及材料分析、产品方案
